ALLOWANCE

Reasons for Allowance

Claims 1-8, 10-16, 18-20 and 22-25 are allowed.

As to claim 1, no prior art was found to show or suggest an apparatus as claimed with a digesting and emulsifying assembly that comprises a separator tank having a closeable opening fluidly associated with an enzymatic digest mixing tank that allows a water layer to be drained from the separator tank and recycled back to operations in the process upstream. Other limitations regarding a digester tank comprising a re-circulation means comprising a chopper pump and a heating means are individually known in the art, however there is no motivation to combine them in order to create the protein recycling system disclosed by Applicant.

As to claim 14, no prior art was found to show or suggest an apparatus as claimed with a digesting and emulsifying assembly comprising heating means, re-circulation means and an emulsifier. While these limitations are known in the art as separate unit operations, there is no motivation to include them in a protein waste recycling system that includes an enzymatic digest mixing assembly, a mobile grinding assembly and a drying system. Furthermore, there is no motivation in the prior art to add a prep tank and a holding tank to the disclosed mobile grinding assembly of Anderson since these structures would be unnecessary and unwieldy if incorporated into the design of Anderson.

As to claim 20, no prior art was found to show or suggest an apparatus as claimed with a mixing operation that comprises a load cell and a digital scale capable of handling proteinaceous agricultural wastes. The Oota (US 6474576) discloses a mixing operation that employs a load

cell, however Oota offers no expectation that the disclosed load cell could be utilized in a device such as Anderson.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Terminal Disclaimer

The terminal disclaimer filed on 14 March 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of copending Application No. 10/607690 has been reviewed and is accepted. The terminal disclaimer has been recorded.
